Mr. Joe Ramey, Proration Manager  
New Mexico Oil Conservation Commission  
P. O. Box 2045  
Hobbs, New Mexico

Dear Sir:

Enclosed please find in triplicate copies Form C-102 setting forth certain work we propose to do on our Howard Fleet Well No. 1, dually completed in the Pennsylvanian and Devonian formations. As you know, we have had some difficulty in establishing satisfactory rates of production from the two zones in this well. Recent tests have indicated the possibility of communication in the Baker Model "D" packer, which is set at 10,743'. After the point of communication has been located and repaired, we will re-install the dual equipment and take packer leakage tests.

Very truly yours,

CABOT CARBON COMPANY
