Attention: Mr. William J. LeMay - Director

Gentlemen:

Chevron U.S.A. Inc. respectfully requests administrative approval for an unorthodox gas well location on the J. N. Carson NCT-A well # 7. This well is in an existing non-standard gas proration unit, which consists of 160 acres. Currently J. N. Carson wells # 9 and # 10 are simultaneously dedicated to this 160 acre proration unit. Well # 7 is being proposed to be abandoned in the current Drinkard zone and recompleted into the Blinebry Oil & Gas zone. All three wells are proposed to be simultaneously dedicated to this 160 acre proration unit. In support of this application, Chevron U.S.A. Inc. states the following facts:

- 1) The 160 acre gas proration unit is already approved.
- 2) Well # 9 produces approximately 0 bopd and 480 mcfpd and well # 10 produces approximately 4 bopd and 200 mcfpd. The allowable is set at approximately 1250 mcfpd, which leaves about 570 mcfpd available.

- 3) Chevron's J. N. Carson well no 7 is located 510' from the southern border and 460' from the western border of the proration unit. The closest Blinebry well is Mobil's E. O. Carson # 14, located at 731' FNL & 1909' FWL of Section 33, approximately 1100' west of well # 7.

Attached is a plat outlining the proration unit with the location of wells 7, 9, and 10, and a map showing all offset properties and wells.

Chevron U.S.A. Inc. has mailed, by certified mail, a copy of this application to the offset Operators.

In view of the facts submitted, Chevron U.S.A. Inc. requests that administrative approval of this request be granted. If additional information is required, please contact me at (915) 687-7152.

Sincerely,

Lloyd V. Trautman
Sr. Petroleum Engineer
