12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

On 1/10/94, we commenced operations to plug this well. We pulled the rods, tubing and pump. We tagged the CIBP at 9395' and mixed and pumped 25 sx Class "C" cement which was spotted on top of the plug. The casing was perforated with 3 jsfp at 4730'.* We mixed and pumped 35 sx Class "C" cement. A third plug was spotted at the bottom of the 13 3/8" casing. We mixed and pumped 30 sx Class "C" (spotted at 2270'). The final plug was spotted at 63' from surface (10 sx Class "C"). On 1/25/94, we cut off the casing head and installed the dry hole marker. The 2 3/8" tubing was used at the Caprock State #1 location. The 2 7/8" tubing, rods, head and pump jack were hauled to FLM. The OCD was notified last week by our Lovington office that the location was ready for inspection.

(* perforated casing was 7")

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
