## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS NOTICES

Submit this notice in TRIPLICATE to the District Office, Oil Conservation Commission, before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Gentlemen:

> FULL DETAILS OF PROPOSED PLAN OF WORK (FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Well was drilled to a total depth of 12,362' without encountering oil or gas in commercial quanities. We propose to plug and abandon the well by placing cement plugs at the following depths: 25 sx. at total depth, 25 sx. at top of Penn., 25 sx. at top of Tubb, 25 sx. at base of San Andres, 25 sx. at top of San Andres, and 25 sx. at the bottom of the intermediate casing. The 8-5/8" casing will be cut and pulled from approximately 1900', and a 25 sack plug placed in the stub. We will then place a 25 sack plug at the bottom of the surface casing and a 10 sack plug at the top of the surface casing.
