

NEW MEXICO OIL CONSERVATION COMMISSION  
PACKER SETTING REPORT

I, Fred Burns, being of lawful age and having full  
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by Sinclair Oil Corporation in the capacity of  
Superintendent, that on December 29, 1968

I personally supervised the setting of a Baker Model "D"  
Make & type of packer  
in Sinclair Oil Corporation, Lea 878 State,  
Operator of well Lease name

Well no. 1 located in the Cerca Penn & Cerca Lower Wolfcamp  
Lea county, state of New Mexico, at a subsurface depth of  
10,330 feet, said depth measurement having been furnished me by  
The Western Company;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

  
(Signature)

Superintendent
