measurements). Ran two strings 2-3/8" tubing with Model "K" packer at 10,316', acidized each zone w/500 gals MCA. Now flowing and testing the dual completed zones. Upper Penn zone kicked off flowing October 25, 1968, and Lower Wolfcamp kicked off flowing October 26, 1968.

It will be noted that 7" casing was run in lieu of 5-1/2" casing as reported on Form C-101. The above well is dual completed in Lower Wolfcamp and Upper Penn. zones. After testing and conducting packer leakage test, the Lower Wolfcamp zone will be shut in pending approval of dual completion by New Mexico Oil Conservation Commission.
