R. L. Burns Corp. is acting in the capacity of a management firm for this well. This well has been shut-in since February 1980 awaiting approval of the two Working Interest Owners to proceed with a pulling job to change out down hole equipment and return the well to production. The work specifically requires the conversion of the well from a full casing bore hydraulic pump to a pump down hydraulic pump. Should you require additional information please feel free to contact us.
