17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) \*

Application to Drill filed June 18, 1982 indicated the proposed objective to be a Devonian test to about 14,000.

It is requested that the Application to Drill be revised to indicate the proposed objective to be oil production in the San Andres formation at about 4900'. Surface casing will be set using cable tools.

The casing program and Surface Use Plan will remain as originally filed, in case the operator exercises the option to drill to the Devonian.
