SUBSEQUENT REPORT OF:

REMEDIAL WORK ☐ ALTERING CASING ☐
COMMENCE DRILLING OPNS. ☐ PLUG AND ABANDONMENT ☐
CASING TEST AND CEMENT JOB ☐
OTHER: ☐

Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Present perforations: 9992-9996' Bough E (per 6/85 workover)
9971-9972' (Lower Bough D) open and communicated to perfs
9992-9996' on backside per tracer survey 6/11/85)

This well was originally completed in Bough C, D & E. The Bough C and Upper D were squeezed,
with most of the production coming from the Bough E And Lower D. Propose to perforate, acidize
and test the Bough D zone alone. Will put on rod pump to test. Will then evaluate to add
Bough C and Bough AB.

Workover Procedure: POH with rods and pump. NU BOP and TOOH with tubing.
Perforate Bough D 9939-9972' with 10 holes-1 spf. Acidize perfs (9939-9972') w/2000 gals
15% NEFE acid. Swab and evaluate. Put on rod pump to test Bough D, if swab results warrant
it. If they do not, add Bough C perfs. Bough C procedure will follow.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
