2. SPECIFIC PURPOSES OF COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was temporarily abandoned in October 1987 by setting a CIBP at 9830' and dumping 35' of cement on top, then setting a CIBP at 9408' and dumping 35' of cement on top of that CIBP also. We propose to P&A the well as follows:

1. Load hole above CIBP at 9408' with 9.0 PPG mud, laden fluid.
2. Cut and remove approximately 7500' of 5-1/2" casing (TOC by CBL is at 8125').
3. Spot 100' cement plug from 50' inside 5-1/2" casing stub to 50' above stub (25 sacks at 1.18 ft³/sk Class "H").
4. Spot 100' cement plug from 50' below 8-5/8" casing shoe to 50' into 8-5/8" casing (4161'-4061'). This volume calculates to be approximately 35 sacks.
5. Spot 100' cement plug inside 8-5/8" casing from 1776'-1676' (Top of salt section at 1726').
6. Spot 10 sacks surface plug.
7. Install P&A marker, clean and level location.

THE COMMISSION MUST BE NOTIFIED 24 HOURS PRIOR TO THE BEGINNING OF PLUGGING OPERATIONS FOR THE C-103 TO BE APPROVED.

3. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
