Attn: Mr. M. W. Slater

RE: Dove VK State Well #5  
Unit O, Sec. 3, T14S, R33E

Gentlemen:

We wrote to you in March concerning the fact that some of the perforations you added to the above-referenced well were in the Wolfcamp and that you would need to apply for a downhole commingle order or squeeze the perfs that are in the Wolfcamp zone. The top of the Penn, according to our geologist is 9665 feet. Your perforations are 9400-9815.

As of this date we have not received a copy of your downhole commingle application nor have we received a report that the zone has been squeezed.

Your prompt attention to this matter will be expected.

Very truly yours,

OIL CONSERVATION DIVISION
