**** EXPECTED FIELDNOTES ****

The subtended sketch truly depicts a survey which I did on the ground, according to law, for the purpose of staking out a location for a well to be drilled in the center of the south west $\frac{1}{4}$ of the south west $\frac{1}{4}$ of section No. 25, township No. 2 south in range No. 30 east, N.M.P.M. in Roosevelt, County, New Mexico. This survey also, shows the elevation of ground at said well location.

This survey is based upon the remaining evidences of the original survey as appear on the ground today in the form of old fences and public roads also the photostatic copy of the original survey was duly consulted and general apperances are favorable to substantiate my survey as being reasonably correct.

Surveyed July 18th. 1951.

Chain carriers, myself and Emanuel King.
