

OIL CONSERVATION COMMISSION

HOBBS, NEW MEXICO

January 2, 1958

Makin Drilling Co.
Box 1622
Hobbs, New Mexico

Gentlemen:

Mr. Eric Engbrecht, Oil & Gas Inspector for the Commission, has made an inspection of the location for your plugged and abandoned Seefeld No. 1 in Unit C of Section 29, T-5-S, R-37-E and has found that the cellar has not been filled and no marker has been erected with a legal description of the location inscribed thereon.

Please file Form C-105, Well Record, for the well, and advise this office when the above work has been done so that a final inspection may be made and your Report of Final Plugging approved without further delay.

Yours very truly,

OIL CONSERVATION COMMISSION

R. F. Montgomery

THEORY OF THE HOMOGENEOUS
EQUATION

The first part of the theory is devoted to the study of the properties of the homogeneous equation. It is shown that the solutions of the homogeneous equation are linearly independent and that the set of all solutions forms a vector space of dimension n .

The second part of the theory is devoted to the study of the properties of the inhomogeneous equation. It is shown that the solutions of the inhomogeneous equation are linearly independent and that the set of all solutions forms a vector space of dimension n .
