EXPLORATION ENGINEERING

Portales, New Mexico

October 30th., 1950

Mr. Roy Yarbrough,
c/o New Mexico Oil Conservation Comm;
Hobbs, New Mexico.

Dear Roy:

I, am pleased to advise that we have made a high gravity discovery in the first Permian Lime, at from 2235 to 2390'. On two drill stem tests of this zone have recovered oil, along with drilling mud, and gas at the rate of 5bbbls; p.h., with flowing pressure of 400pds.

We topped the SanAndreas at 3142, and the oil sand at 3150 to 3178'. While we have not tested this as we are completing in the upper zone. I do believe the SanAndreas would be the better of the two zones.

We are running 2235' of 20# 7inch, and cementing with 200 sacks; Halliburton.

I, enclose form 103, covering plugging of the McCabe No.1, in the SESW $\frac{1}{4}$ of sec.31, 2, 31, Roosevelt County, New Mexico. As soon as I dispose of the suite I have against McKenzie, which should be at an early date. I shall start the next well on this lease.

With kind regards, I am,

Sincerely,

W. J. Peterman
