The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: Endorsement being furnished direct by Ellis Smith & Co.  
We propose to use the following strings of casing and to land or cement them as indicated:

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about 3400 feet.

Additional information: Irregular location is due to highway and surface structure in the center of this 40-acre tract. In taking over the operations of W. F.
