Re: Enserch Exploration, Inc.  
Lambirth Well  
Roosevelt County, New Mexico

Dear Mr. Sexton:

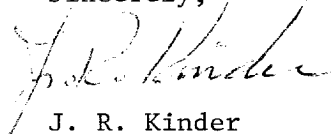

Permit to Drill the Lambirth No. 1 well was issued March 7, 1978. Drilling Commenced March 13, 1978 and was in progress when it was discovered a surveying error had been made during the original staking of the well. Drilling operations were suspended at that time; the well was plugged and the location moved 1,680 feet to the North.

Attached please find Forms C-101, Application to Drill the Lambirth well in the first location, Form C-102, showing the first location with the corrected distances from the section line and Form C-103 showing the casing in the well and the plugs. It is also requested the number of this well be changed from the No. 1 to the No. 2 well.

Forms C-101 and C-102 are also attached for the Lambirth No. 1 well in its present and correct location. These forms may not be necessary as they are the same, with minor casing changes, as the original forms.

If further information is required, please advise.

Sincerely,

J. R. Kinder
