Re: Lambirth #3-G, Section 31, T5S, R33E

Gentlemen:

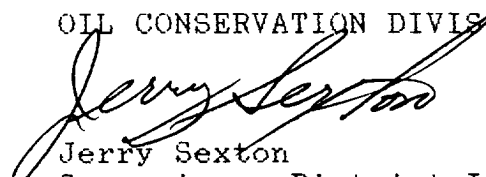

The special rules allocating an 80 acre proration unit to the South Peterson-Pennsylvanian Associated Pool in Roosevelt County, New Mexico, was rescinded by Division Order R-5853-A, effective March 1, 1980, and special rules assigned by Division Order R-5353-I, effective February 19, 1982. A standard oil proration unit consists of 40 acres, with a limiting G-O-R of 4000/1.

In order to update our records and to comply with Division requirements, we request that you submit a new plat, Form-C-102, dedicating a standard 40 acre proration unit to the production from the South Peterson Pennsylvanian Associated Pool. Since this is an existing well, the plat need not be signed by a surveyor.

We are enclosing copy of Division Order R-5853-A and R-5353-I, for your information. We are also enclosing blank forms, C-102, for your convenience.

Very truly yours

OIL CONSERVATION DIVISION
