

Division Director  
Application for Non-Standard Proration Unit  
November 13, 1987  
Page 2

The Lambirth No. 8 was recently recompleted to the Penn Formation as an oil well on 40 acres, however, since re-completion the GOR has gradually increased to 50,000/1 based on latest well tests. Since Section 30, T-5-S, R-33-E is checkerboarded on 80 acre tracts between Phillips and Enserch, we can only assign 80 contiguous surface acres. Consequently, EP Operating Company hereby requests that this well be classified as a gas well and assigned 80 acres which consist of the N/2 of the SW/4 of Section 30, T-5-S, R-33-E.

In addition, a request for waiver of objection has been sent to Phillips Petroleum Company by certified mail.

Sincerely,

A handwritten signature in dark ink, appearing to read "Luis Acevedo", is written over the typed name.

Luis Acevedo  
District Petroleum Engineer
