Re: R & C Petroleum Inc.
Spradlin Well No. 1
Unit I 2-T2N-R29E
Roosevelt County, NM

Dear Mr. Sexton:

In response to your letter of May 10, 1989, R & C Petroleum Inc. has asked me to complete and submit the delinquent forms on the subject well.

As R & C advised you, they have an ongoing dispute with their drilling contractor which makes full completion of the required reports difficult. They supplied me with a copy of their daily drilling report from Baker and Taylor and a short report from their geologist. These were used by me to prepare the attached reports.

It would appear that sufficient information has been provided to resolve this matter. If not, please call me and I will attempt to get whatever is missing.

I am attempting to confirm that the dry hole marker has been set and that the location has been cleaned up and made ready for inspection. As soon as I have, I will call Evelyn Downs with that information.

Sincerely,

A handwritten signature in dark ink, appearing to read 'R. L. Stamets', with a long horizontal line extending to the right.

R. L. Stamets
