That he is employed by Union Oil Company of California in the capacity of Drilling Supt. and as such is its authorized agent.

That on November 1, 1960, he personally supervised the setting of Brown Oil Tool 2" x 7" HS 16-1 and
a Brown Oil Tool 2" x 7" HS 17-2C in Union Oil Company of California's

That said packer was set at a subsurface depth of feet,
said depth measurement having been furnished by Union Oil Company of California

That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
