(40-acre Subdivision)  
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK  
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

The subject well was completed at TD 13,567', PBD 9,900', on 3-30-55 for an initial daily potential of 1800 BO, no water, with 2,668 BFG, flowing thru 48/64" choke, TP 500', GOR 1432. Pay Wolfcamp 9754-9866'. The flowing capacity of this well has declined to 44 BOPD due to increasing water production and low reservoir energy.

In order to increase production, permission is requested to install the following 2 1/2" Kobe pumping equipment: standard free-type production unit, casing-type bottom hole assembly, casing-type 4-way valve assembly, control section with constant flow controller, 2400'-1 1/2" OD line pipe, wellhead material, and miscellaneous assemblies, sections, etc.

A subsequent report will be submitted upon completion of the above work.
