(Place)

**October 22, 1953**  
(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the.....

**Continental Oil Company** State **Q-15** Well No. **1** in **G** (Unit)  
(Company or Operator)  
**SW**  $\frac{1}{4}$  **NE**  $\frac{1}{4}$  of Sec. **15**, T. **16S**, R. **32E**, NMPM., **Wilcoat** Pool  
(40-acre Subdivision)  
**Lea** County.

**FULL DETAILS OF PROPOSED PLAN OF WORK**  
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Subject well is now dead. The capacity of this well is 18 bbls. oil per day as determined by swabbing and pressure build up test, which is considered below the economical limit for artificial lifting that would be required at this depth.

Therefore it is proposed to recomplate the subject well in the Pennsylvanian which on drill stem test indicated commercial production. In order to do this, it will be necessary to squeeze off the present Wolfcamp perforations 9849' to 9869', drill out the cement retainer at 9904' and approximately 20' of the cement plug and float collar in the bottom of the 7" casing which is set at 12,433' and selectively perforate and test the interval 12,370-12,400'. It is also proposed to sandfrac the section with approximately 2,500 gallons to obtain maximum productive capacity if necessary.

Permission is requested to perform the above recompletion and a subsequent report will be filed upon completion of this work.

Approved..... **OCT 23 1953**....., 19.....  
Except as follows:

Approved
