Detailed account of work done, nature and quantity of materials used, and results obtained.

Converted combination rig from rotary tools to cable tools and drilled a-lead making 8" hole to depth of 3460'. Ran 4-1/2" 10.50# ST&C Casing with centralizers, baffle and guide shoe. Casing was landed at 3460' and set with 200 sack portland cement w/2% Gel. Waited on cement 24 hours and pressured up on string to 1000# and held at this pressure for a period of 30 minutes with no drop in pressure. Proceeded with further well completion operations.
