Well No. 1 is located 1980 ft. from N line and 2240 ft. from W line of sec. 31

SE NW 1 16S 32E NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Robinson Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4112 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to convert our Brinson Federal R #1 from a producing to a water injection well in the Aztec-Robinson Waterflood Unit.

Water injection will be through tubing with packer into existing perforations. This well will be changed from the Robinson Pool to the Aztec-Robinson Waterflood Unit, and the lease and well number to Tract #2, #31-6 respectively.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
