Well No. 3 is located 660 ft. from $\begin{Bmatrix} N \\ S \end{Bmatrix}$ line and 980 ft. from $\begin{Bmatrix} E \\ W \end{Bmatrix}$ line of sec. 31

$\begin{matrix} NW & NE & \frac{1}{4} \\ (\frac{1}{4} \text{ Sec. and Sec. No.}) \end{matrix}$ $\begin{matrix} 16S & 32E \\ (\text{Twp.}) & (\text{Range}) \end{matrix}$ $\begin{matrix} NMPM \\ (\text{Meridian}) \end{matrix}$

Robinson Lea New Mexico

(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4159 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intentions to convert our Brinson Federal "R" #3 from a producing to water injection well in the Aztec-Robinson Waterflood Unit.

Water injection will be through tubing and packer into existing perforations. This well will be changed from the Robinson Pool to the Aztec-Robinson Waterflood Unit, and the lease and well number to Tract #2, #31-15 respectively.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Aztec Oil & Gas Company
