Well No. **5** is located **1980** ft. from **(N)** line and **600** ft. from **(E)** line of sec. **5**
SE/4 NE/4 Sec. 5 **17** **32** **WEST**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Maljara **Lea** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total approximate depth of 4150' to attempt a completion in the Grayburg-San Andres horizon. All casing points will be cemented in accordance with approved methods of the USGS, and any special requirements will be complied with.

It is planned to use the following casing pattern: 11" hole, 7 5/8" casing to be set at 950' and cemented with 475 sacks. Cement is to circulate. 6 3/4" hole, 4 1/2" casing to be set at 4050' and cemented with 225 sacks. Cement is to return to 1950'.

Approval to produce this well upon completion is also requested.

Verbal approval was obtained from Mr. A. E. Brown on 4-15-62.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
