Miller M No. 4

August 3, 1960

Well No. 4 is located 660 ft. from N line and 660 ft. from E line of sec. 14NE 1/4 NE 1/4 Sec. 14 17N 12E N. M. P. M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)McJannet Las New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a total depth of approximately 4450'. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing pattern: 11" hole to be drilled, 8 5/8" casing to be set at approximately 200' and cemented with 135 sacks, cement to be circulated. 7 7/8" hole to be drilled, 5 1/2" casing to be set at approximately 4450' and cemented with 900 sacks. It is calculated the cement behind the 5 1/2" casing will return to 800'.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
