This is a Report of: (Check appropriate block)

☐ Results of Test of Casing Shut-off

☐ Beginning Drilling Operations

☐ Remedial Work

☐ Plugging

☒ Other __Change of Operator & Contractor__

Detailed account of work done, nature and quantity of materials used and results obtained.

Reworking of this well was begun on October 1, 1955, with Kersey & Co., Artesia, N.M. as operator and Carl Howell, Artesia, N.M. as drilling contractor.

Considerable difficulty was encountered in cleaning out the old 5" pipe from 2467' to 2830', the latter being the maximum depth obtained to date. New 5" casing has been cemented in place, making contact with the old 5" casing at 2470'. Three feet of the old 5" casing has been removed with a bell socket. Cement inside the 5" casing has been drilled out to total depth of 2534' to date.

Effective 12/16/55, operator has been changed to E. C. Donohue, El Paso, Texas and effective 1/6/56 drilling contractor is changed to Tom Boyd, Artesia, New Mexico.

Further efforts to reach total depth of 3850', as originally contemplated, will be made at this time.
