New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Attn: Mr. A. L. Porter, Secretary-Director

Dear Sir:

Buffalo Oil Company seeks administrative approval to convert their Mitchell "B" well No. 17 from a producing well in the Maljamar Oil Pool, Lea County, New Mexico to a gas injection well in the Maljamar Cooperative Repressuring Agreement project as provided by section V, Order No. R-485, dated November 14, 1942. In support of this request, Buffalo Oil Company makes the following statements.

1. Buffalo Oil Company, a Maryland Corporation with offices in Tulsa, Oklahoma and Artesia, New Mexico, is the sole owner and operator of their Mitchell "B" lease (Federal No. LC-029405-b) consisting, in part, of Section 17, T-17S, R-3E, Maljamar Pool, Lea County, New Mexico upon which their Mitchell "B" well No. 17 is located 660' NWNE of the section and lease lines, Unit N.

2. The subject well and production unit are within the confines of the Maljamar Cooperative Repressuring Agreement as set out by Commission Order No. R-485. All operators within the operating area have been notified by letter of the proposal to convert this well to a gas injection well as a part of the Maljamar Cooperative Repressuring Agreement project without objection.

3. The subject well is presently capable of producing 4 BOPD, which is considered by the operator to be at its economic limit and is no longer capable of producing oil in commercial quantities. As a result of this well's failure to produce economic quantities of oil, a request to cancel the well's allowable has been filed, effective July 1, 1957.

4. The subject area is not served by present injection wells of the repressuring project and is, consequently, in a low pressure area. The conversion of this well to an injection well will serve to increase the reservoir pressure of the surrounding area, thereby making more energy available by which additional oil may be produced.

卷之三

On the 10th January 1918, I was given the rank of Captain and sent to the 1st Battalion, Royal Welsh Fusiliers at their camp at Llandaff, Cardiff. The 1st Battalion Royal Welsh Fusiliers were part of the 1st Division, and were to be sent to France as reinforcements to the British Expeditionary Force. I was given my first command, that of a platoon of 40 men, and was told to go to the front line at Ypres. I was given a Lewis Gun and a Vickers Machine Gun, and was told to go to the front line at Ypres. I was given a Lewis Gun and a Vickers Machine Gun, and was told to go to the front line at Ypres. 5. Buffalo Oil Company has received approval from the United States Geological Survey to convert this well to a gas injection well by their form 9-331a submitted by Buffalo Oil Company June 17, 1957 and approved by Robert F. Evans, acting District Engineer, Roswell, New Mexico dated June 20, 1957.

Wherefore, Buffalo Oil Company further states that approval of the proposed conversion of Mitchell "B" well No. 17 will result in conservation of oil and prevent waste in this pool through more efficient production practices and will result in greater recovery of oil in the area surrounding this well. With these facts in mind, Buffalo Oil Company respectfully requests approval of the conversion of their Mitchell "B" well No. 17 from a non-profitable oil producer to a gas injection well in the Maljamar Cooperative Repressuring Agreement pressure maintenance project by Administrative action as set out in the Commission Order No. R-485, Section V, dated November 14, 1942.

Very truly yours,

Buffalo Oil Company
