Artesia, New Mexico Jan. 25, 1951

William Mitchell R

Well No. 24-7 is located 660 ft. from N line and 1780 ft. from E line of sec. 17
SE/4 SW/4 Sec. 17 17 S. 32 E. N.P.D.M.

(34 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Maljamar-Tadlock Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On January 24, 1951, 13-3/4" OD 4000 casing was cemented at 80' with 75 sacks and cement circulated to the surface. After waiting on cement for 24 hours, drilling will be resumed. No water was encountered down to this depth, and the string merely serves as a conductor.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Buffalo Oil Company

Address Artesia, New Mexico
