Gentlemen:

We are transmitting herewith three copies of C-104, Request for Allowable on Buffalo's Mitchell B 19-P, which was recently deepened from the Maljamar Pool at total depth of 4160' to the Maljamar-Paddock zone at total depth of 5386'. Although tests show this to be top allowable well, we are requesting that an allowable of 50 bbls. per day be assigned. Drilling of the Paddock zone has indicated that the water table is very close and we consider that the allowable should be restricted in order to recover the maximum quantity of oil and delay as much as possible the encroachment of water.

Yours very truly,

BUFFALO OIL COMPANY
