DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, including points, and all other important proposed work)

Fractured through perms 5364-69 w/5,000 gallons lease crude, 5,000# sand, and 250# Adomite. No commercial production was encountered.

It is proposed that this well be abandoned, but not plugged. We recommend that it be retained for possible recompletion or used as a salt water disposal well or waterflooding, if such proves feasible.

The status and our future plans for this well will be reported as required by your office.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
