Artesia, New Mexico, March 8, 19 37

M. E. Baish

Well No. 8 is located 1980 ft. from N line and 660 ft. from XX line of sec. 21

<u>SW NW 21</u> (1/4 Sec. and Sec. No.)	<u>17S</u> (Twp.)	<u>32E</u> (Range)	<u>N M P M</u> (Meridian)
<u>Maljamar</u> (Field)	<u>Lea</u> (County or Subdivision)	<u>New Mexico</u> (State or Territory)	

The elevation of the derrick floor above sea level is 4026 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We will shoot this well with 20 qts. of glycerin from 2300 to 2345'.
If an increase in production results from this shot we will probably follow up with a second shot using 30 to 40 qts. at the same depth.

* Results must be reported on this form within 10 days of work completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Maljamar Oil & Gas Corporation

Address Artesia, New Mexico
