FYI

Date

The MCA 4B water injection header is being S.I. to monitor offset production. Injection wells 31, 76, 78, 34, + 82 may be S.I. up to a year for the evaluation. Attached are copies of intents to perform integrity tests.

A handwritten signature in cursive script, appearing to read "Jerry W. Hoover". To the left of the signature is a circular stamp with a grid pattern, possibly a company seal or a date stamp.
