Johns B

October 22, 1958

Well No. 7 is located 660 ft. from N line and 660 ft. from E line of sec. 24
N 1/4 Section 24 173 32E N 1/4
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Maljamar Lee New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill at the above location with rotary tools to approximately 4350 feet. Surface casing to consist of 10 3/4 inch casing cemented to 170 feet with 150 sacks regular cement. Oil string to consist of 5 1/2 inch casing cemented at total depth with 400 sacks cement. Perforations to be opposite the Grayburg-San Andres as determined by radioactive log. Well to be tested natural and if necessary treated with 500 gallons mud acid and 10,000 gallons sandfines.
