The elevation of the derrick floor above sea level is 4003 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to clean out subject well to total depth if necessary and treat open hole with 500 gallons Jel X-820 followed by 15,000 gallons Sandfrac oil and 20,000# sand. Treatment to be through 2 1/2-inch tubing with packer set in 7-inch casing at approximately 3800 feet.

Total Depth 4190
7" casing @ 3855

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
