Well No. 2 is located 2980 ft. from S line and 3010 ft. from W line of sec. 26  
NE/4 SW/4, Sec. 26 T-17-S, R-32-E NMPH  
Wildcat 1/4 Sec. and Sec. No. (Twp.) (Range) (Meridian)  
Lon New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3969 ft. RD

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On 6-25-62, this well was temporarily abandoned. Since there was no further completion possibilities or utilization for other purposes, we propose to plug and abandon as follows: Get and pull 4-1/2" casing from approx. 4939' and 3-5/8" casing from approx. 4901'. Spot 25 cc. cement plugs as follows: 6549'-6580' (Peris. 6720-6725); 5939' half in and half out of 4-1/2" stub; half in and out of 3-5/8" stub 4870'; half in and out of 3-5/8" stub at approx. 4901'; half in and out of 13-3/8" stub 3831'; and 10 cc. at surface with PRA marker. All intervals to be filled with heavy and laden fluid. Clear location and restore to its natural contour.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
