### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Pan American Petroleum Corporation assigned the rights to this well to Continental Oil Company, and Continental is now the operator.

It is proposed to temporarily abandon the well by spotting the following cement plugs: 10 sacks from 8800-8900, 10 sacks from 8200-8300, 20 sacks from 7650-7740 and 20 sacks from 4570-4630. The 4 1/2" casing which is set at 9150 will be cut and pulled from 7700.

At a later date it is proposed to complete this well in the Pearsall Pool.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
