13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is proposed to recomplete this well from the Grayburg-San Andres to the Queen by the following procedure:

1. Run CBL in 5-1/2" casing from @ 3566' to the TOC.
2. Dump 4 sxs cement on top of CIBP @ 4130'.
3. Pressure test casing to 500 psi.
4. Perforate Queen from 3468'-3488' with 2 jsfp.
5. Acidize perms with 20 bbls of 15% HCl and frac.
6. Put on production.

NOTE: Since the Queen formation is outside the MCA unitized interval, this well will be renamed to the Pearsall BXY #3 if the recompletion is successful. This name change will be filed with the completion and C-104 reports.

14. I hereby certify that the foregoing is true and correct
