OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico,

Gentlemen:

You are hereby notified that it is our intention to commence the drilling of a well to be known as

Amerada Petroleum CorporationState 3 "B"Well No. 2in C/NE/4 NW/4

Company or Operator

Lease

of Sec. 3, T 15-S, R 33-E, N. M. P. M., Saunders Field, Los County.

AREA 640 ACRES

LOCATE WELL CORRECTLY
the way.

The well is 660 feet SW (S.) of the North line and 1980 feet (E.) SW of the West line of Section 3

(Give location from section or other legal subdivision lines. Cross out wrong directions.)

If state land the oil and gas lease is No. E-2118 Assignment No. _____

If patented land the owner is _____

Address _____

If government land the permittee is _____

Address _____

The lessee is Amerada Petroleum Corporation

Address P. O. Box 2040, Tulsa 2, Oklahoma

We propose to drill well with drilling equipment as follows: Rotary tools all

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: Blanket

We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
15"	11-3/4"	47# & 60#	New & S.H.	300'	Cemented	225
9-7/8"	7-5/8"	26.40#	New	3150'	Cemented	1500
6-3/4"	5-1/2"	17. #	New	10000'	Cemented	600

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about 9780 feet.

Additional information:

DEC 29 1950

Approved _____, 19____

except as follows:

Sincerely yours,

Amerada Petroleum Corporation

Company or Operator

By _____

Position Assistant District Superintendent

Send communications regarding well to

Name Amerada Petroleum Corporation

Address Drawer D, Monument, New Mexico

Title Oil & Gas Inspector

1. The first part of the experiment is a qualitative test for the presence of various ions in a sample. This is done by adding a series of reagents to the sample and observing the color changes and precipitates that form.

2. The second part of the experiment is a quantitative test for the concentration of a specific ion in a sample.

3. The third part of the experiment is a qualitative test for the presence of various ions in a sample.

4.

5. The fourth part of the experiment is a quantitative test for the concentration of a specific ion in a sample.

6. The fifth part of the experiment is a qualitative test for the presence of various ions in a sample.

7. The sixth part of the experiment is a quantitative test for the concentration of a specific ion in a sample.

8. The seventh part of the experiment is a qualitative test for the presence of various ions in a sample.

9. The eighth part of the experiment is a quantitative test for the concentration of a specific ion in a sample.

10.

11. The ninth part of the experiment is a qualitative test for the presence of various ions in a sample.

12.

13. The tenth part of the experiment is a quantitative test for the concentration of a specific ion in a sample.

14. The eleventh part of the experiment is a qualitative test for the presence of various ions in a sample.

15. The twelfth part of the experiment is a quantitative test for the concentration of a specific ion in a sample.

16. The thirteenth part of the experiment is a qualitative test for the presence of various ions in a sample.

17.

18.

19. The fourteenth part of the experiment is a qualitative test for the presence of various ions in a sample.

20. The fifteenth part of the experiment is a quantitative test for the concentration of a specific ion in a sample.

[Handwritten signature]

21. The sixteenth part of the experiment is a qualitative test for the presence of various ions in a sample.

22. The seventeenth part of the experiment is a quantitative test for the concentration of a specific ion in a sample.

23. The eighteenth part of the experiment is a qualitative test for the presence of various ions in a sample.

24. The nineteenth part of the experiment is a quantitative test for the concentration of a specific ion in a sample.
