Re: Application For Dual Completion

Gentlemen:

Attached is an Application For Dual Completion of the Tennessee Gas Transmission Company State A. A. Kamitz "B", Well No. 5, located in Unit B, Section 25, Township 16 South, Range 33 East, W. M. P. M., Lea County, New Mexico.

Tennessee proposes to utilize parallel strings of 2-3/8 inch tubing for the production of oil from the Kamitz Wolfcamp Pool and an undesignated Pennsylvanian (Cisco) pool. A schematic diagram of the proposed completion is attached. A similar application was approved on Order No. R-1201 for the dual completion of the Phillips Petroleum Company New Mex "A", Well No. 1, the Southeast offset to the subject well. Administrative approval of this application is therefore respectfully requested.

Tennessee further proposes to commingle the production from these zones into common surface storage after separately measuring the production from each zone by the use of positive displacement meters. A similar request was approved on Order No. R-1201 for the Phillips Petroleum Company New Mex "A" No. 1. If administrative approval to this portion of the Application cannot be granted, then it is respectfully requested that the matter be scheduled for hearing at an early date.

All offset operators have been furnished copies of this Application and waivers requested from each.

Very truly yours,

TENNESSEE GAS TRANSMISSION COMPANY
