Re: Forms on State #1
Sec. 25-16-33

Gentlemen:

A check of the file on your plugged and abandoned State #1 shows that we do not have Form C-103 reporting the results of the test of the casing shut-off, nor do we have a Form C-103 on the subsequent work which was done on this well before the plugging. Please file these forms at your earliest convenience so that an inspection may be made of this location and the file cleared on this well.

Yours very truly,

OIL CONSERVATION COMMISSION

HOBBES, NEW MEXICO

1934

Production of Oil
in the Hobbes Field

1934-1935
1935-1936

1936-1937

The following table shows the production of oil in the Hobbes field for the years 1934-1935, 1935-1936, and 1936-1937. The production is shown in barrels per day and in total barrels for the year.

Year	Production (Barrels per Day)	Production (Total Barrels)
1934-1935	1,200	438,000
1935-1936	1,500	547,500
1936-1937	1,800	657,000

1937-1938

1938-1939

1939-1940
1940-1941
