Attention: Mr. Roy O. Yarbrough

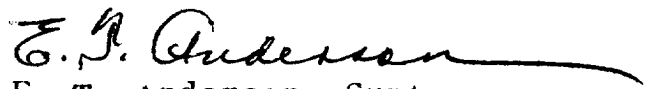

Dear Mr. Yarbrough:

As you know we are now drilling a well located Center of NE of the NE, Section 7, 17-S, R-33-E. We anticipate a producer as it is an off-set to production, and in the event of production we wish to connect to the tank battery now in use on our off-setting State "A" Lease.

This State "A" lease has two producing wells on it, No. A-1 located in the Center of the NW of the NE of Section 7, T-17-S, R-33-E and No. A-2 located in the Center of the NE of the NW of Section 7, T-17-S, R-33-E both connected to a common tank battery.

You can appreciate that this arrangement will save us considerable money in the form of a tank battery, and since they are all state leases we are asking approval for the above action. Your consideration will be appreciated.

Yours very truly,

E. T. Anderson, Supt.
