The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

To drill Federal Elliott water well No. 1 to an approximate depth of 110'.
Expect water sand from 90 to 110 feet. Will set 6-5/8" casing to bottom.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
