

YORK "ARQ" #1

Page 2.

Yates Petroleum Corporation proposes to re-enter this well bore. This well was originally drilled by Humble Oil and Refining in 1955 to a TD of 11,020'. The well was plugged in December 1955. In July 1972 Stoltz, Wagner and Brown re-entered this well bore and deepened the hole to a total depth of 13,269'. The well was plugged in August of 1972. We will drill out the plugs to the original TD of 13,269' and run open hole logs. If determined to be commercial, 5 1/2" production casing will be run and cemented with adequate cover, perforated, and treated as necessary to gain production.

MUD PROGRAM: Will drill out plugs using 9# Cut Brine to TD.

BOPE PROGRAM: Will install 5000# BOPE on the 8 5/8" casing and test daily for operational.
