INSTRUCTIONS

This certificate shall be executed and filed in QUADRUPPLICATE with the District Office of the Oil Conservation Commission, covering each unit from which oil or gas is produced. A separate certificate shall be filed for each transporter authorized to transport oil or gas from a unit. After said certificate has been approved by the Oil Conservation Commission, one copy shall be forwarded to the transporter, one copy retained by the producer, and two copies retained by the Oil Conservation Commission.

A new certificate shall be filed to cover each change in operating ownership and each change in the transporter, except that in the case of a temporary change in the transporter involving less than the allowable production for the production period, the operator shall, instead of filing a new certificate notify the Oil Conservation Commission District Office and the transporter authorized by certificate of the change. The Commission, by letter, of the estimated amount of oil or gas to be moved by the transporter temporarily moving oil or gas from the unit and the name of such temporary transporter and a copy of such notice shall also be furnished to the permanent transporter. Such temporary transporter shall not move any more oil or gas than the estimated amount shown in said notice.

This certificate when properly executed and approved by the Oil Conservation Commission shall constitute a permit for pipe line connection and authorization to transport oil and gas from the property named therein and shall remain in full force and effect until:

- (a) Operating ownership changes
- (b) The transporter is changed or
- (c) The permit is cancelled by the Commission.

If any of the rules and regulations of the Oil Conservation Commission have not been complied with at the same time this report is filed, explain thereunder the following "REMARKS."

In all cases where this certificate is filed to cover a change in operating ownership, the transporter designated to move oil or gas shall, under either (a) or (b), be the previous owner or operator and the transporter designated to the final owner of oil or gas.

This certificate shall be filed to cover each production of oil or gas and shall be retained by the Commission.
