With OCD approval, we plan to plugback this well to the Wolfcamp. The existing Penn perfs at 10,342' - 10,378' will be isolated by a CIBP set at 10,300'. Cement (10') will be spotted on top of the plug. The Wolfcamp will be perforated from 10,164' to 10,172' (4 spf) and acidized with 2500 gals 15% HCl acid. We will swab back the load, run the production equipment and test. All tubing will be mechanically inspected prior to running back in the hole.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
