

HUMBLE OIL & REFINING COMPANY

D. H. CROCKETT 1.

Schematic diagram of proposed dual Devonian-oil, Wolfcamp-oil completion.

Devonian: To be pumped through 2-3/8-inch non-upset tubing.

Wolfcamp: To be flowed through 1-1/4-inch non-upset tubing.

Devonian

Wolfcamp

13-3/8-inch at 303 Feet  
Cemented to Surface

Sucker Rods

9-5/8-inch at 4746 Feet  
Cemented to 720 Feet

Subsurface Pump

1-1/4-inch non-upset tubing

2-3/8-inch  
non-upset tubing

10542'

Proposed  
Wolfcamp  
Interval

10580'

Note: Both strings of tubing to be of special clearance to go through 5-1/2-inch, 23" casing

Non-retrievable Packer

13592'

Devonian

13648'

5-1/2-inch Casing at 13650'  
Cemented to 3700'
