17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

At time of Yates Petroleum Corporation take over, well had PBTD 10200 and casing perforations at 10040-10110, 9998-10015. We have since run straddle tests on each set of perforations; pfs 10040-10110 was treated w/2000g 15% DS-30 Acid and swabbed salt water 1120000 ppm Chloride with no show of oil or gas; pfs 9998-1001 was treated w/1000g 15% DS-30 and swabbed back salt water 92000 ppm Chloride with a small show of gas. Well is currently shut in while our geologists are studying the well logs for possible testing up the hole before plugging and abandonment.
