New Mexico Oil Conservation Commission
District 1
Box 2045
Hobbs, New Mexico

Gentlemen:

Please find enclosed New Mexico Oil Conservation Commission Form C-102 in triplicate, on which we very respectfully request permission to plug and abandon our Warren M. Snyder #1, and outline in detail our proposed method of plugging this well.

Verbal permission was given us to conduct this plugging operation, under the Commission's specified conditions that we submit Forms C-102, and C-103, each in triplicate, immediately. It was further specified verbally by the commission that final approval and release from our plugging and abandonment, operations, would be given only after Commission's inspection of Pit Clean-up, and location cleaning, which on this occasion will come 60 days to 90 days after well plugging.

We agreed to notify the Commission when ready for final inspection.

Very truly yours,

CABOT CARBON COMPANY
